Subject: Avery Landing Natural Attenuation Performance Monitoring - Round 2
Attachments: Draft Avery Landing GW Monitoring Report_Tbls.pdf; Final Avery Landing GW Monitoring Plan_Fig 02.pdf

Hi Earl –

On behalf of Potlatch, attached are the results of the second round of groundwater monitoring at the Avery Landing site. The results show that groundwater remains below the benchmark concentrations at the site.

We will present the results of the four rounds of monitoring in a formal report after the fourth round is completed. But wanted to provide these to you in advance.

Please let me know if you have any questions or comments.

Thank you.
